Kittikorn Asunee na Ayutthaya

Flutter & Web Developer

Portfolio + live demos

kttikon160@gmail.com · 095-146-6990 · Chiang Mai, Thailand · github.com/xzzdz

PROFILE

Flutter developer with hands-on production experience — built a handheld POS app end to end and develops the web admin's payment and automatic slip-verification flow, Excel reports and PDF documents. Integrates APIs (REST / PHP), collaborates through GitHub and builds apps from UX/UI designs (e.g. Figma). Currently expanding into TypeScript, Node.js and Next.js to grow in web and backend development.

EXPERIENCE

Dzentric Co., Ltd. · Software Developer (Flutter) — Oct 2024 – Present · Chiang Mai

- Built Chaoperty Handheld V2 (Flutter) for Sunmi V2 POS terminals single-handedly: stall map, QR payments, slip upload, 58 mm receipts, meter readings, 4 languages — and cut the APK from 50 MB+ to ~15 MB
- Built the new payment screen (Payment Intents) and a payment-verification page with automatic slip checks: slips matched to bank statements with a confidence score, then approved in bulk
- Built Excel reports (Syncfusion XlsIO) with summary sheets and formula totals, plus PDFs: lease contracts (including Lao) and multi-template receipts/invoices
- Developed and maintained PHP endpoints and integrated the Payment Intents / Reconcile API shared by the web and the app
- Shipped assigned widgets/features (user permissions, area ordering, document templates) and cleaned up code — split multi-thousand-line files into MVVM + services and merged duplicate pages
- Work through GitHub with the team: feature branches, pull requests, code review and SemVer tags

SELECTED PROJECTS

Chaoperty Handheld V2 ↗ — Flutter · Riverpod · go_router · Dio · package:pdf · Sunmi Printer

Handheld POS app for market collectors, built solo: stall map, 3-step payment with QR or slip, receipt printing, meter reading, and 4 languages (Thai/English/Chinese/Lao)

Chaoperty Web Admin ↗ — Flutter Web · Provider · MVVM · PHP API · Payment Intents · XlsIO · PDF

Rental-space back office — my part: the new payment screen, payment verification with automatic slip checks, Excel reports, contract/receipt PDFs, user permissions and APIs

SKILLS

Mobile	Flutter, Dart, Riverpod, Provider, go_router, MVVM + Repository, Android (Sunmi POS)
Web	Flutter Web, HTML/CSS, Figma → UI · TypeScript, React/Next.js, Tailwind CSS (learning)
API / Backend	REST API (Dio/http), PHP API, JSON, Payment Intents / Reconcile, PromptPay EMVCo QR · Node.js (learning)
Documents	Excel (Syncfusion XlsIO), PDF (package:pdf), contract & receipt templates, 58 mm thermal printing, Thai/Lao fonts
Tools	Git/GitHub, Pull Request & review, Conventional Commits, refactoring to MVVM, Docker, flutter_test

EDUCATION

Chiang Mai Rajabhat University · Bachelor of Science in Computer Science — 2021 – 2025
